Objective

Hello there! I'm Udit Narayan Yadav a B.Tech undergraduate currently in my second year, maintaining a current CGPA of 7.5. I've developed a keep interest in python full stack and web devloper . My aspiration is to become a skilled engineer capable of making a positive impact and assisting others.

Experience

- Currently I have no experience

Education

- **Bandhav public school** 2020
High school
73.6%
- **Bandhav public school** 2022
Higher secondary
68.9%
- **Jawaharlal Nehru College of technology** 2022-2026
Bachelor of computer science engineering
7.5%

Skills

- Core python
- Advanced python
- Project management
- Communication

Achievements & Awards

- Receiving an Academic Award or Prize on a sports and many activities

Interests

- "As a highly motivated and detail-oriented individual with a passion for innovative technology, I am excited to pursue a career in computer engineering. With a strong foundation in mathematics and physics, I am eager to explore the intricacies of computer hardware and software design, development, and integration. I am particularly interested in [specific areas of interest, such as web development and data analytics]. I am confident that my analytical skills, creativity, and ability to work effectively in teams will enable me to make valuable contributions to the field of computer engineering and drive technological advancements that transform the way we live and work."
